

G-CAT Board Meeting 5/20/2013

In attendance:

Loren Janulewicz
Larry Ransford
John Hartnett
Vic Evans
Irene Young

Discussion:

- April minutes and approved.
- We reviewed the financials. Net for April is about \$17,000 profit in spite of being down 223 rounds from prior year. Now that weather is improving hope to see revenue growth.
- Golf Now appears to be a beneficial tool since we are getting play from them.
- Ed is working hard on booking more tournaments. Looks like we have 25 so far with 2 more looking like they will be booked soon. So far a couple of tournaments have been played and have been very successful.
- Working with the Metro District regarding the encroachment issues on hole 13.
- The irrigation system on the back nine is old and a challenge. Unfortunately we do not have funds to replace it right now so need to patch the best we can. The heads on 10 & 18 and 14 & 15 are electric and appear to be working ok. The remainder of the heads are controlled by air pressure. If there is a leak in the air hose, which has been happening, then all the heads pop up and do not have correct pressure to water as intended. We have managed to fund replacing the main air line for these holes and the work has been completed without any impact to the course. Kept the existing smaller air lines to each sprinkler head. Hopefully this will reduce the leaks and allow Bob to water the back nine successfully.
- Meeting adjourned.
